an old boat sets sail and a young boy finds home. Together, boy and boat ride the shifting tides, catching wants and wishes until fate calls for a sea change. Brothers and collaborators Jarrett and Jerome Pumphrey's newest picture book is a masterfully crafted celebration of the natural world and tribute to the families we make and the homes that we nurture.

Matt Keegan interviews artists and commissions writing to reassess the 1990s as the moment when the Democratic Party abandoned its New Deal values and swung to the right In the

wake of the Trump election, artist Matt Keegan (born 1976) began investigating the Democratic Party's shifts over recent decades. In the late '80s, members of the Democratic Leadership Council successfully moved the party's platform to the right by including a pro-business, pro-military, interventionist agenda, and downplaying social infrastructure as a calculated break from its New Deal-era foundation. This shift led to Bill Clinton's consecutive terms. 1996 captures this pivotal time in American politics and society through the experience of artists who

completed their undergraduate studies in that year and voted for Clinton, and others who were born in 1996 and voted for the first time in 2016.

Essays focus on cultural and ideological shifts from that time, such as the 1994 Crime Bill, 1996 Immigration Act, the Telecommunications Act, the start of Fox News and beyond.

Longlisted for the National Book Award New York Times Bestseller A former Wall Street quant sounds an alarm on the mathematical models that pervade modern life --

and threaten to rip apart our social fabric We live in the age of the algorithm. Increasingly, the decisions that affect our lives--where we go to school, whether we get a car loan, how much we pay for health insurance--are being made not by humans, but by mathematical models. In theory, this should lead to greater fairness: Everyone is judged according to the same rules, and bias is eliminated. But as Cathy O'Neil reveals in this urgent and necessary book, the opposite is true. The models being used today are opaque, unregulated, and uncontestable, even when

they're wrong. Most troubling, they reinforce discrimination: If a poor student can't get a loan because a lending model deems him too risky (by virtue of his zip code), he's then cut off from the kind of education that could pull him out of poverty, and a vicious spiral ensues. Models are propping up the lucky and punishing the downtrodden, creating a "toxic cocktail for democracy." Welcome to the dark side of Big Data. Tracing the arc of a person's life, O'Neil exposes the black box models that shape our future, both as individuals and as a

society. These "weapons of math destruction" score teachers and students, sort r sum s, grant (or deny) loans, evaluate workers, target voters, set parole, and monitor our health. O'Neil calls on modelers to take more responsibility for their algorithms and on policy makers to regulate their use. But in the end, it's up to us to become more savvy about the models that govern our lives. This important book empowers us to ask the tough questions, uncover the truth, and demand change. -- Longlist for National Book Award (Non-Fiction) -- Goodreads, semi-finalist for the 2016

When a woman who was pivotal to his past arrives in Bitter Bark, he wonders if her appearance is coincidence or the guiding hand of his dearly departed wife....but the truth is neither. She's about to change his life again in ways he could never have imagined. And Daniel isn't sure if his heart or his family will ever recover from the impact.

art and thought, an exploration of intimacy and vulnerability between two young artists learning to be soft with each other in a world that hardens against Black people.”—Yaa Gyasi, author of *HOMEGOING* In a crowded London pub, two young people meet. Both are Black British, both won scholarships to private schools where they struggled to belong, both are now artists—he a photographer, she a dancer—and both are trying to make their mark in a world that by turns celebrates and rejects them. Tentatively, tenderly, they fall in love. But two people who seem destined to be

together can still be torn apart by fear and violence, and over the course of a year they find their relationship tested by forces beyond their control. Narrated with deep intimacy, *Open Water* is at once an achingly beautiful love story and a potent insight into race and masculinity that asks what it means to be a person in a world that sees you only as a Black body; to be vulnerable when you are only respected for strength; to find safety in love, only to lose it. With gorgeous, soulful intensity, and blistering emotional intelligence, Caleb Azumah Nelson gives a profoundly

and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The 2020 edition sheds light on the state of innovation financing by investigating the evolution of financing mechanisms for entrepreneurs and other innovators, and by pointing to progress and remaining challenges - including in the context of the economic slowdown induced by the coronavirus disease (COVID-19) crisis.

All organizations must cope with future uncertainties.

These uncertainties affect the strategic choices they make. They must commit scarce organizational resources to future outcomes which they have little assurance will come into being. Marcus explores how decision makers in the energy industry made choices in the face of such uncertainties, specifically examining two major uncertainties they confronted in the 2012-2018 period - price volatility and climate change. Marcus tells the story of how different companies in the integrated oil and natural gas sector and in the motor vehicle sector responded to

these uncertainties. In the face of these challenges, companies in the energy industry hedged their bets by staking out paradoxical or contrasting positions. On the one hand, they focused on capturing as much gain as they could from the world's current dependence on fossil fuels and on the other hand they made preparations for a future in which fossil fuels might not be the world's dominant energy source.
