This up-to-date historical narrative traces Ethiopia's history from antiquity to the present day.

This, the first volume of Sir E. A. Wallis Budge's The History of Ethiopia: Nubia and Abyssinia, first published in 1928, presents an account of Ethiopian history from the earliest legendary and mythic records up until the death of King Lebna Dengel in 1540. Using a vast range of sources - Greek and Roman reports, Biblical passages, Egyptian hieroglyphs, and Ethiopian chronicles - an enthralling narrative history is presented with clarity. This reissue will be of particular interest to students of Ancient Egyptian culture, religion and history.

This international collection of essays offers a unique approach to the understanding of imperial Ethiopia, out of which the present state was created by the 1974 revolution. After the 1880s, Abyssinia, under Menilek II, expanded its ancient heartland to incorporate vast new territories to the south. Here, for the first time, these regions are treated as an integral part of the empire. The book opens with an interpretation of nineteenth-century Abyssinia as an African political economy, rather than as a variant on European feudalism, and with an account of the north's impact on peoples of the new south. Case studies from the southern regions follow four by historians and four by anthropologists, each examining aspects of the relationship between imperial rule and local society. In revealing the region's diversity and the relationship of the periphery to the centre, the volume illuminates some of the problems faced by post-revolutionary Ethiopia.

This book is an historical investigative account of the history of the expanding and often nebulous borders of Ethiopia, beginning from ancient times to 1800. It deals with areas that have for years been contentious and problematic for the adjacent peoples in the region: Land of Bahr Nagash, Ifat, Adal, Fatagar, Dawaro, Bali, Damot, Gurage, Waj, Gamo, Ganz, Kafa, etc.
