Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in

the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

Golden Kite Award for Nonfiction Webster's American Dictionary is the second most popular book ever printed in English. But who was that Webster? Noah Webster (1758-1843) was a bookish Connecticut farm boy who became obsessed with uniting America through language. He spent twenty years writing two thousand pages to accomplish that, and the first 100 percent American dictionary was published in 1828 when he was seventy years old. This clever, hilariously illustrated account shines a light on early American history and the life of a man who could not rest until he'd achieved his dream. An illustrated chronology of Webster's life makes this a picture perfect bi-og-ra-phy [noun: a written history of a person's life].
