This is a very short function that leverages a Node.js package, fs. It allows us to interact with the operating system (for example to read or write files to it). This is exactly what we need in order to be able to read our data source file. The code itself follows the standard Node.js callback mechanism.

~~How to Automate Simple Tasks with Node.js~~

Automate your workflow with the power of Node.js! If your job is loaded with manual work, then why not write scripts that can deal with it for you? With this book, you will learn how to deal with many tasks such as zipping files, emailing colleagues, and deploying your work at the press of a button. The book is structured into two parts: The first part is a collection of recipes, or building blocks that behave as individual global commands.

~~A Guide to Automating & Scraping the Web with JavaScript ...~~

Adding a new command to the CLI is as simple as that. Now, `oclif_cli add command` is ready to be used. However, we still have to implement its internal logic. To achieve this, we should change the already created `add.js` file inside the `src` directory.. The fully-implemented `add` command should be able to accept an argument that specifies the weight of the user and record it with a timestamp.

~~Learn How to Build CLI Automation Tools with NodeJS~~

While testing with Node.js, you should try to follow the test automation pyramid. As seen from the following image, the unit test should be taken as the base of all the testing.

~~19 Best Practices for Automation Testing With Node.js ...~~

Description. Finding ways to speed up your development workflow can greatly improve your efficiency in completing work. In this course, Automating Node.js with NPM Scripts, you will gain the ability to quickly and efficiently build Node.js applications with NPM. First, you will learn how to get started with creating scripts.

~~How to Use NPM Scripts to Automate Node.js | Pluralsight~~

```
const searchForm = await page.$('#search-form-top'); await searchForm.evaluate(searchForm => searchForm.submit()); // Keep the browser open. // browser.close();})();
```

Since we are using the `async/await` syntax, all the steps will execute in the correct order and wait for each other to finish. Automated Form Input.

The `selenium-webdriver` Node.js package comes with a module that may be used to write tests that run with the Mocha testing framework instead. You can further automate your browser integration tests by hooking Selenium WebDriver up to a cloud-based Virtual Machine setup, such as that provided by SauceLabs or BrowserStack.

~~Browser automation using Selenium WebDriver and Node.js ...~~

Workflow Automation with Node.js and Express. One of the more abstract concepts you'll handle when building your business is what the workflow will look like. At its core, setting up a standardized workflow is about enabling your service providers (agents, hosts, customer service reps, administrators, and the rest of the gang) to better serve your customers.
