After decades of civil war and instability, the African country of Angola is experiencing a spectacular economic boom thanks to its most valuable natural resource: oil. Focusing on the everyday realities of people living in the extraction zones, Reed explores the exclusion, degradation, and violence that are the fruits of petrocapiialism in Angola.

Reform of American education is largely motivated by concerns about our economic competitiveness and American's standard of living. Yet, few if any of the public school reform agendas incorporate economic principles or research findings. *Improving America's Schools* explores how education and economic research can help produce, in the words of Harvard's Dale W. Jorgenson, "a unified framework for future education reform." This book presents the perspectives of noted experts, including Eric A. Hanushek, author of *Making Schools Work*, on creating incentives for improved school and student performance; Under Secretary of Education Marshall S. Smith on the Clinton Administration's reform program; and Rebecca Maynard, University of Pennsylvania, on the education of the disadvantaged. This volume explores these areas

Bookmark File PDF Brazil Sbm Offs

The importance of schooling to labor market success. The prospects for combining school-based management with teacher incentives to gain the best of both approaches. The potential of recent innovations in student achievement testing, including new "value-added" indicators. The economic factors involved in maintaining an adequate stock of effective teachers. The volume also explores why, despite similar standards of living, France, the Netherlands, England, Scotland, and the United States produce different levels of education achievement. *Improving America's Schools* informs the current debate over school reform with a fresh perspective, examples, and data. This readable volume will be of interest to policymakers, researchers, educators, and education administrators as well as economists and employers--it is also readily accessible to concerned parents and the larger community.

Across OECD countries, almost one in every five students does not reach a basic minimum level of skills. This book presents a series of policy recommendations for education systems to help all children succeed.

The OECD Anti-Bribery Convention focuses on enforcement through the criminalisation of foreign bribery but it is multidisciplinary and includes key requirements to combat money laundering, accounting fraud, and tax evasion connected to foreign bribery. The first step, however, in enforcing foreign bribery and related offences is effective detection. This study looks at the primary sources of detection for the foreign bribery offence and the role that certain public agencies and private sector actors can play in

Bookmark File PDF Brazil Sbm Offs

uncovering this crime. It examines the practices developed in different sectors and countries which have led to the successful detection of foreign bribery with a view to sharing good practices and improving countries' capacity to detect and ultimately step-up efforts against transnational bribery. The study covers a wide range of potential sources for detecting foreign bribery: self-reporting; whistleblowers and whistleblower protection; confidential informants and cooperating witnesses; media and investigative journalism; tax authorities; financial intelligence units; other government agencies; criminal and other legal proceedings; international co-operation and professional advisers.

This open access book brings together research findings and experiences from science, policy and practice to highlight and debate the importance of nature-based solutions to climate change adaptation in urban areas. Emphasis is given to the potential of nature-based approaches to create multiple-benefits for society. The expert contributions present recommendations for creating synergies between ongoing policy processes, scientific programmes and practical implementation of climate change and nature conservation measures in global urban areas. Envelopment Analysis (eds, W.W. Cooper, L.M. Seiford and J, Zhu, 2011, Springer) in an effort to extend the frontier of DEA research. It provides a comprehensive source for the state-of-the art DEA modeling on internal structures and network DEA. Chapter 1 provides a survey on two-stage network performance decomposition and modeling techniques. Chapter 2 discusses the pitfalls in network DEA modeling. Chapter 3 discusses efficiency decompositions in network DEA under three types of structures, namely series, parallel and dynamic. Chapter 4 studies the determination of the network DEA frontier. In chapter 5 additive efficiency decomposition in network DEA is discussed. An approach in scale efficiency measurement in two-stage networks is presented in chapter 6. Chapter 7 further discusses the scale efficiency decomposition in two stage networks. Chapter 8 offers a

bargaining game approach to modeling two-stage networks. Chapter 9 studies shared resources and efficiency decomposition in two-stage networks. Chapter 10 introduces an approach to computing the technical efficiency scores for a dynamic production network and its sub-processes. Chapter 11 presents a slacks-based network DEA. Chapter 12 discusses a DEA modeling technique for a two-stage network process where the inputs of the second stage include both the outputs from the first stage and additional inputs to the second stage. Chapter 13 presents an efficiency measurement methodology for multi-stage production systems. Chapter 14 discusses network DEA models, both static and dynamic. The discussion also explores various useful objective functions that can be applied to the models to find the optimal allocation of resources for processes within the black box, that are normally invisible to

DEA. Chapter 15 provides a comprehensive review of various type network DEA modeling techniques. Chapter 16 presents shared resources models for deriving aggregate measures of bank-branch performance, with accompanying component measures that make up that aggregate value. Chapter 17 examines a set of manufacturing plants operating under a single umbrella, with the objective being to use the component or function measures to decide what might be considered as each plant's core business. Chapter 18 considers problem settings where there may be clusters or groups of DMUs that form a hierarchy. The specific case of a set off electric power plants is examined in this context. Chapter 19 models bad outputs in two-stage network DEA. Chapter 20 presents an application of network DEA to performance measurement of Major League Baseball (MLB) teams. Chapter 21 presents an

application of a two-stage network DEA model for examining the performance of 30 U.S. airline companies. Chapter 22 then presents two distinct network efficiency models that are applied to engineering systems.

In a context of increased primary school enrollment rates, secondary education is appearing as the next big challenge for Latin American and East Asian countries. This report seeks to undertake a detailed diagnostic of secondary education in these two regions, understand some of the main constraints to the expansion and improvement of secondary education, and suggest policy options to address these constraints, with focus on policies that improve the mobilization and use of resources.
