Corporate capitalism has been criticized for the amount of power and influence corporations and large business interest groups have over government policy, including the policies of regulatory agencies and influencing political campaigns (see corporate welfare). Many social scientists have criticized corporations for failing to act in the interests of the people, and their existence seems to circumvent the principles of democracy, which assumes equal power relations between individuals in a ...

*Corporate capitalism - Wikipedia*

the corporate capitalist economy necessarily entails an account of the kind of entity that a corporation is and how its legal privileges relate to the real interests of persons with a stake in its activities. The key question is: which stakeholders have a right for their particular interests to be represented by a corporation and to hold its

*Rejoinder to Veldman's review of Capitalism, Corporations ...*

Capitalism is a social and economic system which recognizes individual rights, including the right to own properties and the possession of goods for the individual's personal consumption. Corporatism, on the other hand, is a form of economy that was created as an option to socialism and intends to achieve social justice and equality without the need to take away private property from individual members of society.
