# Online Library Central Nervous System Brain

This takes us to a consideration of the structure of the central nervous system. It broadly includes the brain and the spinal cord. The brain, in turn, includes the cerebrum or the new brain, the cerebellum, the thalamus and the medulla oblongata or the brain-stem. The cerebrum is known as the new brain because biologically it is the last to evolve and at the human level it is the most important part of the brain.
