Step 1, Check your Wi-Fi connection on your devices. Most internet-connected devices have a symbol that resembles a dot with arching lines on the display to indicate your Wi-Fi connection and strength. The more arching lines displayed, the stronger your Wi-Fi connection. If one device is not getting no or a poor Wi-Fi signal, the problem is most likely with the device. If it is happening on all ...Step 2, Make sure Wi-Fi is turned on. Click or tap the Wi-Fi icon on your computer or smart ...

~~3 Ways to Fix Common Computer Network Issues - wikiHow~~

solution : (a) For each link, it takes 1 Gbps/5 kb = 5 ? s to transmit the packet on the link, after which it takes an additional 10 ? s for the last bit to propagate across the link. Thus, for a LAN with only one switch that starts forwarding only after receiving the whole packet, the total transfer delay is two transmit delays + two propagation delays = 30 ? s.
