The Reverend Raymond Janin, A.A., (31 August 1882 – 12 July 1972) was a French Byzantinist. An Assumptionist priest, he was also the author of several significant works on the Byzantine studies.. Major works. *La Thrace: Études historique et géographique* (1920); *Les Églises orientales et les rites orientaux* (1922); *Saint Basil, archevêque de Césarée et Docteur l'Église* (1929)

This collection of papers on the city of Constantinople by a distinguished group of Byzantine historians, art historians, and archaeologists provides new perspectives as well as new evidence on the monuments, topography, social and economic life of the Byzantine imperial capital.

The successful coexistence of different ethnic, linguistic, and religious groups within the same political boundaries depends in part on the resolution of the tension between uniformity and separateness. This volume reviews sources of tension and their resolution in a number of cases that may be considered paradigmatic and which include nomads and Muslims, the Serbs, the Armenians, and the population of Byzantine Italy. The mechanisms of integration or acculturation and their

Various degrees of success are investigated - as are the responses of different groups - in an effort to present some of the complexities of this society, rich in its diversity and impressive in its unicity.

"A beautifully illustrated, new edition of the best single-volume guide to Byzantine art, providing an introduction to the whole period and range of styles."--

From its foundation, the city of Constantinople dominated the Byzantine world. It was the seat of the emperor, the centre of government and church, the focus of commerce and culture, by far the greatest urban centre; its needs in terms of supplies and defense imposed their own logic on the development of the empire. Byzantine Constantinople has traditionally been treated in terms of the walled city and its immediate suburbs. In this volume, containing 25 papers delivered at the 27th Spring Symposium of Byzantine Studies held at Oxford in 1993, the perspective has been enlarged to encompass a wider geographical setting, that of the city's European and Asiatic hinterland. Within this framework a variety of interconnected topics have been addressed, ranging from the bare necessities of life and defence to manufacture and export, communications between the capital and its hinterland, culture and artistic manifestations and the role of the sacred.

The Handbook contains eighty-nine articles by leading experts on all significant aspects of the diverse and fast-growing field of Byzantine Studies, which deals with the history and culture of the Byzantine Empire, the eastern half of the Late Roman Empire, from the fourth to the fourteenth century.

This volume in the ongoing Late Antique Archaeology series draws on material and textual evidence to explore the diverse religious world of Late Antiquity. Subjects include Jews and Samaritans, orthodoxy and heresy, pilgrimage, stylites, magic, the sacred and the secular.

A wide-ranging survey of the history of the Roman Empire—from its establishment to decline and beyond Empire of the Romans, from Julius Caesar to Justinian provides a sweeping historical survey of the Roman empire. Uncommonly expansive in its chronological scope, this unique two-volume text explores the time period encompassing Julius Caesar's death in 44 BCE to the end of Justinian's reign six centuries later. Internationally-recognized author and scholar of Roman history John Matthews balances broad historical narrative with discussions of important occurrences in their thematic contexts. This integrative approach helps readers learn the timeline of events, understand their significance, and consider their historical sources. Defining the time period in a clear, yet not overly restrictive manner, the text reflects contemporary trends in the study of social, cultural, and literary themes. Chapters examine key points in the development of the Roman Empire, including the establishment of empire under Augustus, Pax Romana and the Antonine Age, the reforms of Diocletian and Constantine, and the fall of the Western Roman Empire. Discussions of the Justinianic Age, the emergence of Byzantium, and the post-Roman West help readers understand the later Roman world and its impact on the subsequent history of Europe. Written to be used as standalone resource or in conjunction with its companion Volume II: Selective Anthology, this innovative textbook: Combines accessible narrative exposition with thorough examination of historical source material Provides well-
