Longlisted for the National Book Award New York Times Bestseller A former Wall Street quant sounds an alarm on the mathematical models that pervade modern life -- and threaten to rip apart our social fabric We live in the age of the algorithm. Increasingly, the decisions that affect our lives--where we go to school, whether we get a car loan, how much we pay for health insurance--are being made not by humans, but by mathematical models. In theory, this should lead to greater fairness: Everyone is judged according to the same rules, and bias is eliminated. But as Cathy O'Neil reveals in this urgent and necessary book, the opposite is true. The models being used today are opaque, unregulated, and uncontestable, even when they're wrong. Most troubling, they reinforce discrimination: If a poor student can't get a loan because a lending model deems him too risky (by virtue of his zip code), he's then cut off from the kind of education that could pull him out of poverty, and a vicious spiral ensues. Models are propping up the lucky and punishing the downtrodden, creating a "toxic cocktail for democracy." Welcome to the dark side of Big Data. Tracing the arc of a person's life, O'Neil exposes the black box models that shape our future, both as individuals and as a society. These "weapons of math destruction" score teachers and students, sort resumes, grant (or deny) loans, evaluate workers, target voters, set parole, and monitor our health. O'Neil calls on modelers to take more responsibility for their algorithms and on policy makers to regulate their use. But in the end, it's up to us to become more savvy about the models that govern our lives. This important book empowers us to ask the tough questions, uncover the truth, and demand change. -- Longlist for National Book Award (Non-Fiction) -- Goodreads, semi-finalist for the 2016 Goodreads Choice Awards (Science and Technology) -- Kirkus, Best Books of 2016 -- New York Times, 100 Notable Books of 2016 (Non-Fiction) -- The Guardian, Best Books of 2016 -- WBUR's "On Point," Best Books of 2016: Staff Picks -- Boston Globe, Best Books of 2016, Non-Fiction

Detailed description of 3,800 accredited colleges and universities in the United States, including 2-year colleges and technical schools.

During this time of intense polarization, Ronald Crutcher's life as a Black leader successfully bridging America's cultural divides offers a compelling story with important lessons for today's thinkers. Born to two parents who never graduated high school, Dr. Crutcher grew up to become a leader at the highest levels of academia and the arts. As a child musician, he met with Coretta Scott King. As an adult educator, he sat at Maya Angelou's holiday table. But it is Dr. Crutcher's success as a Black intellectual navigating highly charged social issues that makes his story both unforgettable and urgently important. Whether negotiating cancel culture at the University of Richmond, where he serves as President in the heart of the former Confederacy, or teaching Northeast liberals the true meaning of functional diversity, Dr. Crutcher offers an education on life and leadership that none of us can afford to ignore.
