This book highlights the present status of manuscript collection in the different repositories of India, and also suggests some remedial measures which are required to be adopted for the proper conservation, care and management of manuscripts. It showcases the nature of base material, ink, pigments, binding materials, writing and illustration techniques used in different manuscripts, given the importance of having thorough knowledge about the chemical composition of different materials before adopting any kind of conservation practice. As dating of manuscript is a very difficult task, a great variety of techniques and methodology such as palaeography, style of writing, illustration and terminology, colophon, spectrometric methods, and radio carbon dating, among others, are discussed here. Furthermore, as prevention is better than cure, different preventive measures, including indigenous methods practiced during the ancient period for preservation of manuscripts, are also outlined, as are the hazards of using different chemicals for conservation of manuscripts.

Fully updated and extended to include the many changes that have occurred in the last decade and including glossary, sources of information and bibliography, this books draws on a wide range of practical experience to provide an invaluable guide

to all aspects of museum work and staff experience for museums worldwide.

In today's busy world, museums compete for visitors not only with other museums, but also with a worthy selection of cultural institutions from performing arts to libraries. Add to these magnets a slew of enticing leisure activities, from theme parks to jogging trails. Given a weekend afternoon with a little free time to spare, a prospective visitor has a tempting selection of destinations to choose from. Branding a museum helps it stand out from the crowd by giving it an image and personality with which visitors and supporters can identify, increasing their emotional attachment and encouraging them to return. In *Museum Branding*, Wallace offers clear, practical advice on how to brand a museum department by department, step by step. By highlighting case studies from museums of every type and size, she emphasizes that brains, not budget, create a successful branding effort. This new edition is heavily updated to reflect digital branding from start-to-finish and features three entirely new chapters: Public Relations and Social Media Theaters, Conservation Labs, and Visible Storage Spaces Databases

This book acquaints the reader with the composition of the art objects, their properties and behaviour under diverse conditions so as to facilitate their care, maintenance and preservation.

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper
