A missing woman leads her twin sister on a twisted scavenger hunt in this clever debut novel with eccentric, dysfunctional characters who will keep you guessing until the end—for readers of *Luckiest Girl Alive* and *The Wife Between Us*. Ava has her reasons for running away to Paris. But when she receives the shocking news that her twin sister, Zelda, is dead, she is forced to return home to her family's failing vineyard in upstate New York. Knowing Zelda's penchant for tricks and deception, Ava is not surprised when she receives her twin's cryptic message from beyond the grave. Following her sister's trail of clues, Ava immerses herself in Zelda's drama and her outlandish circle of friends and lovers, and soon finds herself confronted with dark family legacies and twisted relationships. Is Zelda trying to punish Ava for leaving? Or is she simply trying to write her own ending? Cate Dolan-Leach's debut thriller is a literary scavenger hunt for secrets hidden everywhere from wine country to social media, and buried at the dysfunctional heart of one utterly unforgettable family. Praise for *Dead Letters* "Dolan-Leach writes like Paula Hawkins by way of Curtis Sittenfeld."—Amy Gentry, author of *Good as Gone* "A sharp, wrenching tale of the true love only twins know . . . Dolan-Leach nimbly entwines the clever mystery of Agatha Christie, the wit of Dorothy Parker, and the inebriated Gothic of Eugene O'Neill."—Kirkus Reviews "A smart, dazzling mystery . . . Dolan-Leach revels in toying with both Ava and her audience . . . and the result is captivating."—Publishers Weekly (starred review) "Draws you in like you are part of the story itself, living and breathing alongside the compelling characters as they uncover the dark secrets of their complicated family."—Wendy Walker, author of *All Is Not Forgotten* "Push-pull tension . . . This book is wine-soaked yet lucid, comforting and frightening, asking the big questions about intimacy and loyalty."—Caroline Kepnes, author of *You*

"ABC San Antonio: an alphabet guidebook to the Fiesta City is an unusual and unique souvenir that combines the value of a traditional ABC book for children and a colorful and helpful guidebook (for adults). It is also a tribute to the delightful people of San Antonio in a special feature called Meet Ten San Antonians which introduces readers to local folks whose creative jobs capture our imagination and introduce children to the numbers 1 through 10. The bright,

Table of Contents Introduction Chapter 1: Appearance and Behavior Chapter 2: Environment Conclusion Author Bio Bonus Dinosaur Content Introduction to Dinosaurs Facts about Dinosaurs Dinosaur Extinction Dinosaur Fossils Dinosaur Eggs Dinosaur Names Dinosaur Diet Feathered Dinosaurs Plant Eating Dinosaurs The Weirdest Dinosaurs The Deadliest Dinosaurs Flying Dinosaurs Kinds of Dinosaurs The Biggest Dinosaurs The Smallest Dinosaurs Author Bio Publisher Introduction Salutations young reader! Today we are going to embark on a journey back to the age of the dinosaurs. The dinosaurs are some of the most incredible animals that ever lived on our planet. They lived nearly 200 million years ago and thrived for about 165 million years. We humans have only been around for about 60,000 years and we have only been using computers for about 75 years. The dinosaurs mysteriously became extinct and disappeared from our earth, but left their fossilized remains behind. Dinosaur fossils have been constantly discovered in human history; the Chinese thought they were dragon bones and Europeans thought they were the bones of biblical monsters. Luckily, the scientific study of dinosaurs began in between 1815-1824 with the discovery of an Iguanodon fossil. Since then dinosaurs have been discovered all over the world. Their immense size, strange shapes, and wonderful natures make them inherently worthy of interest. The study of dinosaurs requires depth of imagination, analytical skills, and thought. The many unanswered questions about their lives, behavior, and disappearance provoke the curious to seek answers and ask even more questions. I hope this book fuels your imagination and makes you want to learn even more about dinosaurs. I hope you learn to appreciate the value of the dinosaurs and that you bring a spirit of openness and wonder on your journey back to the age of the dinosaurs. We know what we know about the dinosaurs from a variety of sources including fossils, biology, and other scientific disciplines. Fossils are the ancient remains of the dinosaurs, the most familiar being their bones. Biological science is the study of life in general, but many scientists compare the dinosaurs to modern day animals to support their theories. In this book we are going to talk about the Troodon. The Troodon was one of the first dinosaurs discovered in the United States. It is interesting because it is one of the smartest dinosaurs that ever lived. We will not only talk about scientists figured out it was intelligent, but also about its probable behavior and relationship with its environment. Before a talk about dinosaurs can take place it is important that we discuss the theory of evolution. Evolutionary theory supposes that all the animals we know and see today are the direct descendants of animals that existed millions of years ago. The dinosaurs and other creatures that existed millions of years ago either died out or gradually

changed into different animals. For instance, birds are considered to be surviving dinosaurs because their dinosaur ancestors survived the dinosaur extinction event (we will discuss this later). The Troodon is considered by scientists to be a direct ancestor or very close relative to modern birds. Remember that any time you see an \* next to the name of a dinosaur, it means that a book has been written about this dinosaur in the Dinosaur Books for Young Readers series. Any word written in bold is an important scientific term which is defined in-text. Italics are used to denote the first time a dinosaur's name is mentioned in the book.

What can theology offer in the context of neoliberalism, globalization, growing inequality, and an ever more ecologically precarious planet that disproportionately affects the poor? This book, by one of the country's best-known Latino theologians, explores possibilities for liberation from the forces that would impose certain forms of knowledge on our social world to manipulate our experience of identity, power, and justice. Beautifully written in a refreshingly direct and accessible prose, Maduro's book is nevertheless built upon subtly articulated critiques and insights. But to write a conventional academic tractatus would have run counter to Maduro's project, which is built on his argument that ignorance is masked in the language of expertise, while true knowledge is dismissed because it is sometimes articulated in pedestrian language by those who produce it through the praxis of solidarity and struggle for social justice. With a generosity and receptivity to his readers reminiscent of letters between old friends, and with the pointed but questioning wisdom of a teller of parables, Maduro has woven together

a twenty-first-century reply to Marx's "Theses on Feuerbach." Neither conventional monograph nor memoir, neither a theological nor a political tract, but with elements of all of these, *Maps for a Fiesta* arrives as Maduro's philosophical and theological testament—one that celebrates the knowledge-work and justice-making of the poor. What Maduro offers here is a profound meditation on the relationship between knowledge and justice that could be read as a manifesto against the putatively unknowable world that capitalist chaos has made, in favor of a world that is known by the measure of its collective justice. His fiesta grants us the joy that nourishes us in our struggles, just as knowledge gives us the tools to build a more just society. What Maduro offers is nothing less than an epistemology of liberation.
