Financial Algebra: Advanced Algebra with Financial Applications is a substantive modeling course for all students that teaches and uses advanced algebra in the content areas of discretionary spending, banking, credit, auto and home ownership, employment, taxes, investments, entrepreneurship, retirement, & budgeting. The program draws upon selected topics from Advanced Algebra, Geometry, Precalculus, Statistics and Probability. Students need only an Algebra 1 prerequisite. The newest edition includes the most recent IRS tax code updates and how they affect our daily lives. Over the decades, the program has proven to be a motivating, engaging, and rewarding experience for all students.

The Instructor's Edition presents a variety of instructional strategies in the margins of each page to provide guidance in reviewing and reinforcing the chapter content. Related Web sites are often cited along with technology applications and cross-curricular ideas. It also provides discussion topics, enrichment activities, assessment techniques, and correlations to National Standards.

The Regulatory Technology Handbook The transformational potential of RegTech has been confirmed in recent years with US\$1.2 billion invested in start-ups (2017) and an expected additional spending of US\$100 billion by 2020. Regulatory technology will not only provide efficiency gains for compliance and reporting functions, it will radically change market structure and supervision. This book, the first of its kind, is providing a comprehensive and invaluable source of information aimed at corporates, regulators, compliance professionals, start-ups and policy makers. The REGTECH Book brings into a single volume the curated industry expertise delivered by subject matter experts. It serves as a single reference point to understand the RegTech eco-system and its impact on the industry. Readers will learn foundational notions such as: • The economic impact of digitization and datafication of regulation • How new technologies (Artificial Intelligence, Blockchain) are applied to compliance • Business use cases of RegTech for cost-reduction and new product origination • The future regulatory landscape affecting financial institutions, technology companies and other industries Edited by world-class academics and written by compliance professionals, regulators, entrepreneurs and business leaders, the RegTech Book represents an invaluable resource that paves the way for 21st century regulatory innovation.

First in the Arbor Algebra series. A writing-based, common sense, whimsical & engaging introduction to algebra for middle-grade math students.

In today's fast-paced and evolving financial environment it is essential for students to have a strong understanding of mathematics to succeed both personally and professionally. MASTER MATH: BUSINESS AND PERSONAL FINANCE MATH teaches students the mathematics required for success in today's world in an easy-to-read, user-friendly format. It covers all the need-to-know information and skills in business math and personal finance topics.

A groundbreaking introduction to vectors, matrices, and least squares for engineering applications, offering a wealth of practical examples.
