5. Sources of finance for reducing disaster risk are varied and complex 5 6. A number of countries have mobilised their own DRR finance 7 7. Climate finance presents a new opportunity to finance DRR 8 8. Ensuring all new investments are resilient to disaster risk is an opportunity to reduce, rather than lock-in risk 9 9.

Finance for reducing disaster risk: 10 things to know

National financing is essential for the reduction of disaster risk, and the likely future global framework must make this a priority area for support. Research shows that countries have highly variable models and patterns of financing, even across similar risk profiles. Of the five countries studied for this report, Indonesia and the Philippines have the most coherent and coordinated financing, with both stand-alone and sector-integrated funding for disaster risk reduction (DRR).

FINANCING DISASTER RISK REDUCTION

' Disaster risk reduction in developing countries: costs, benefits and institutions ' . Disasters , 36 (4), 559–588. UNISDR (2011) Global Assessment Report on Disaster Risk Reduction 2011.

Financing DRR - Disaster Risk Reduction: An Introduction

ereign Disaster Risk Financing and Insurance (SDRFI) programs in an attempt to be financially prepared for when disasters occur. However, to date limited attention has been given to developing and implementing a coherent quantitative framework for appraising the true economic cost of these various instruments.

Disaster Risk Financing and Insurance: Issues and results

Financing disaster risk reduction. Narrative pages 25. Only through the inclusion of specific and dedicated commitments to national financing for DRR (especially when integrated into development investments) can sustained progress be made in reducing disaster losses. International financing of DRR needs to fully complement national financing, and should serve to catalyse action and support engagement with private finance where appropriate.

Financing disaster risk reduction

The GEF has financed enhanced resilience, adaptation and disaster risk reduction projects for decades, and supports the Sendai Framework for Disaster Risk Reduction, which outlines seven global targets to be achieved by 2030 to reduce global disaster mortality, economic losses and disaster damage to critical infrastructure and disruption of basic services, including health and education facilities, among others.

Disaster reduction finance: prevention is better than recovery

risk financing mechanisms that promote parallel improvements in country systems for crisis response and recovery; technical assistance and capacity building where this is not yet covered by other programs. GRiF will be implemented by the World Bank, the Global Facility for Disaster Reduction and Recovery (GFDRR), and select implementing partners. GRiF funding will be channeled through the World Bank or select implementing partners such as regional development banks.

Global Risk Financing Facility - World Bank

The policy objective of anticipating and reducing risk is called disaster risk reduction (DRR). Although often used interchangeably with DRR, disaster risk management (DRM) can be thought of as the implementation of DRR, since it describes the actions that aim to achieve the objective of reducing risk.
