The world's fastest growing trading markets are options markets. Options offer a world of opportunities that are simply unavailable to the stock trader. Trading stocks is like owning a "hammer," but trading options is like owning the whole toolbox. Why, then, do so many investors lose money in options? They lose because they trade options the way they've always traded stocks. To succeed, you must understand options the way professional options traders do. This book will help you do precisely that. When stock traders look at price, they see information. Options traders see probability, time, volatility -- and perhaps even a lack of information. Stock trading is about having more information than the other guy. Options trading can be about exploiting the lack of information. Stock trades have a 50% chance of success: stocks go up or they don't. Options trades can be structured for 90% probability of success. The very nature of trading is transformed by these radically different dynamics. Michael Hanania Benklifa reveals those dynamics and shows exactly how to take full advantage of them. Benklifa manages millions of dollars in options trades through his own firm. Here, he reveals how he approaches these trades, offering practical, concise and actionable insights based on actual scenarios. If you've struggled to profit from options... if you're intrigued by options, but hesitant... if you're succeeding with options but want to do better... this is the book you've been searching for.
