We grow botanical and hybrid orchids. The narrow specialization of our company may come as a surprise, but botanical orchids are fascinating plants. The Orchidaceae family includes over 27,000 botanical species and several times more hybrids.

The OrchidGarden. We grow botanical and hybrid orchids.

Orchids generally prefer bright but filtered light. They need protection from direct sunshine. Watering, humidity and feeding. Orchids prefer high air humidity, but their roots will rot easily in wet compost. Water them about once a week, ideally using tepid rainwater. Water from above and tip out any water that collects in the saucer under the pot.

Orchids: indoor cultivation / RHS Gardening

Sadly they are often mis-understood by many places where you can find an orchid to buy, whilst several popular orchids are not difficult to grow, some require a little more attention as to where they are placed, but if looked after they will reward you with wonderful blooms year after year, orchids purchased from a specialist orchid nursery will generally do better once you get them home.

Orchid Extravaganza - Ashwood Nurseries

In order to mimic their preferred growing conditions, orchids should be potted in a specialist orchid compost or a mix of moss, bark chips and perlite. Orchids living on branches get soaked regularly by tropical storms, but the water quickly drains away, and orchid compost is similarly free-draining.

How to Repot an Orchid - BBC Gardeners' World Magazine

But, broadly speaking, grow in specialist orchid compost, avoid watering too much, and feed with orchid fertiliser from spring until autumn. Most orchids like bright but indirect light – an east or west-facing windowsill is often perfect. Too much light can scorch the leaves, so don't stand in direct sunshine.

Easy Orchids to Grow - BBC Gardeners' World Magazine

Orchiata is a stand alone orchid growing substrate that can be used directly from the bag. Orchiata is a sustainable orchid growing substrate produced from the finest quality, 100% pure New Zealand Pinus radiata bark.

ORCHID ACCESSORIES- potting compost and orchid supplies ...

There was a time when orchids were thought of as rare and exotic, only available from specialists and challenging to grow. Now, thanks to new advances in breeding and in laboratory propagation, you can buy them in flower in the supermarket, often at very reasonable prices, and grow them on the windowsill.

Keeping your indoor orchids flowering year after year ...

Tropical orchids do well in hanging baskets. Cattleyas prefer pots that are wider than they are deep. Vanda orchids like timber baskets and clay pots, as they have roots that prefer to climb outside their container. All orchids need a free-draining specialist potting mix, with most based on bark chips. Moth orchids like a richer mix.

How To Grow Orchids At Home - Australian Handyman Magazine

You can grow orchids on trees in the subtropics and tropics. Growing orchids on trees may be possible in USDA Zone 11 of the continental United States, according to the AOS. Since orchids come from diverse habitats – from full sun to shady swamps – you will need to evaluate your garden's exposure, and select an appropriate species or hybrid orchid.

Orchid Gardening: What You Need to Know
