Nobody has to tell you that when things go bad, they go bad quickly and seemingly in bunches. Complicated structures like buildings or bridges are slow and laborious to build but, with a design flaw or enough explosive energy, take only seconds to collapse. This fate can befall a company, the stock market, or your house or town after a natural disaster,

and the metaphor extends to economies, governments, and even whole societies. As we proceed blindly and incrementally in one direction or another, collapse often takes us by surprise. We step over what you will come to know as a “Seneca cliff”, which is named after the ancient Roman philosopher, Lucius Annaeus Seneca, who was the first to observe the ubiquitous truth that growth is slow but ruin is rapid. Modern science, like ancient philosophy, tell us that collapse is not a bug; it is a feature of the universe. Understanding this reality will help you to see and navigate the Seneca cliffs of life, or what Malcolm Gladwell called “tipping points.” Efforts to stave off collapse often mean that the cliff will be even steeper when you step over it. But the good news is that what looks to you like a collapse may be nothing more than the passage to a new condition that is better than the old. This book gives deeper meaning to familiar adages such as “it’s a house of cards”, “let nature take its course”, “reach a tipping point”, or the popular Silicon Valley expression, “fail fast, fail often.” As the old Roman philosopher noted, “nothing that exists today is not the result of a past collapse”, and this is the basis of what we call “The Seneca Strategy.” This engaging and insightful book will help you to use the Seneca Strategy to face failure and collapse at all scales, to understand why change may be inevitable, and to navigate the swirl of events that frequently threaten your balance and happiness. You will learn: How ancient philosophy and modern science agree that failure and collapse are normal features of the universe Principles that help us manage, rather than be managed by, the biggest challenges of our lives and times Why technological progress may not prevent economic or societal collapse Why the best strategy to oppose failure is not to resist at all costs How you can “rebound” after collapse, to do better than before, and to avoid the same mistakes.

In Jared Diamond's follow-up to the Pulitzer-Prize winning *Guns, Germs and Steel*, the author explores how climate change, the population explosion and political discord create the conditions for the collapse of civilization. Diamond is also the author of *Upheaval: Turning Points for Nations in Crisis*. Environmental damage, climate change, globalization, rapid population growth, and unwise political choices were all factors in the demise of societies around the world, but some found solutions and persisted. As in *Guns, Germs, and Steel*, Diamond traces the fundamental pattern of catastrophe, and weaves an all-encompassing global thesis through a series of fascinating historical-cultural narratives. *Collapse* moves from the Polynesian cultures on Easter Island to the flourishing American civilizations of the Anasazi and the Maya and finally to the doomed Viking colony on Greenland. Similar problems face us today and have already brought disaster to Rwanda and Haiti, even as China and Australia are trying to cope in innovative ways. Despite our own society's apparently inexhaustible wealth and unrivaled political power, ominous warning signs have begun to emerge even in ecologically robust areas like Montana. Brilliant, illuminating, and immensely absorbing, *Collapse* is destined to take its place as one of the essential books of our time, raising the urgent question: How can our world best avoid committing ecological suicide?

As press secretary to Mikhail Gorbachev, Andrei Grachev witnessed and recorded many events unobserved by the general public. In this engaging and compelling book, he recounts these episodes in vivid detail, interpreting them in the context of the time. Highlighted are top-level meetings with Western leaders; State Council debates on a new treaty of union (promising, until Gorbachev and Yeltsin sparred over Russia's policy toward the Chechen republic); and Gorbachev's private talks with leading members of government, business, and religious and cultural circles from around the world.
