Hal Fischer's "Gay Semiotics: A Photographic Study of Visual Coding Among Homosexual Men" (1977) is one of the most important publications associated with California conceptual photography in the 1970s. This new edition reproduces the look and feel of the original volume, which reconfigured into a book format the 24 text-embedded images of Fischer's 1977 photographic series "Gay Semiotics." The photographs in "Gay Semiotics" present the codes of sexual orientation and identification Fischer saw in San Francisco's Castro and Haight Ashbury districts, ranging from such sexual signifiers as handkerchiefs and keys to depictions of the gay fashion "types" of that era--from "basic gay" to "hippie" and "jock." "Gay Semiotics" also features Fischer's critical essay, which is marked by the same wry, anthropological tone found in the image/text configurations. Fischer's book circulated widely, finding a worldwide audience in both the gay and conceptual art communities. Fischer's insistence on the visual equivalence of word and image is a hallmark of the loose photography and language group that included Fischer, Lutz Bacher, Lew Thomas and others working in the San Francisco Bay Area. First published as an artist's book in 1978 by NFS Press, at a time when gay people had been forced to both evaluate and defend their lifestyles, "Gay Semiotics" earned substantial critical and public recognition. Thirty-seven years later, the book remains a proactive statement from a voice within the gay community from a moment in history just before the devastation wrought by AIDS. Hal Fischer (born 1950) grew up in Highland Park, Illinois. He arrived in San Francisco in 1975 to pursue an MA in photography at San Francisco State. Through his work as an art reviewer and photographer, he soon became embedded in the Bay Area's artistic and intellectual scene. He continues to live and work in San Francisco.

At once humorous, conceptually brilliant and visually enthralling, this is the first monograph to feature the complete set of photo-text works that Fischer produced between 1977 and 1979 in San Francisco's Haight and Castro neighborhoods.

In the early 1970s, Lew Thomas set out to disrupt photography in San Francisco. Tired of the mystical thinking and emotionalism that had underscored Bay Area photography since the 1940s, Thomas pursued a photographic practice grounded in ideas gleaned from conceptual art and Structuralist philosophy. A cohort of other photographers, including Donna-Lee Phillips and Hal Fischer, embraced Thomas' mission, joining him in what became known as the 'Photography and Language' movement, named after a book and group exhibition of the same title produced by Thomas in 1976. Thomas, Phillips and Fischer were all extremely active in the mid to late 1970s. In addition to making their own artwork, they published essays, reviewed shows and organized exhibitions. Under the name NFS Press, Thomas published a number of books designed by Phillips, including 'Structural(ism) and Photography' (1978), which featured Thomas' work, 'Eros and Photography' (1977), which was edited by Phillips, and two books of Fischer's work: 'Gay Semiotics' (1978) and '18th Near Castro Street x 24' (1979). This volume assesses their work, their relationship to one another and their place in the history of photography in the 1970s.

Examining increasingly fluid notions of masculinity over the past six decades, this book offers a culturally diverse collection of work from some of the world's most celebrated photographers. This photographic exploration draws together the work of approximately fifty artists of different ethnicities, generations, and gender identities to look at how ideas of masculinity have evolved since the 1960s. Each of its six themed chapters features bold and arresting work by artists such as Richard Avedon, John Coplans, Robert Mapplethorpe, Herb Ritts, Collier Schorr, Larry Sultan, Wolfgang Tillmans, and David Wojnarowicz, who are all renowned for their depictions of masculinity and its tropes. Others, including Rotimi Fani-Kayode, Masahisa Fukase, Adi Nes, Hank Willis Thomas, and Akram Zaatari, offer ethnically and culturally diverse perspectives. A number of female artists--Laurie Anderson, Annette Messager, Tracey Moffatt, and Marianne Wex--explore the uncomfortable and invasive nature of the male gaze and younger artists such as Sam Contis, Andrew Moisey, Paul Mpagi Sepuya, and Elle Pérez, offer a 21st-century perspective of maleness through the lens of identity and global politics. Each chapter in the book opens with an essay by a key thinker in the fields of art, history, culture, and queer studies. Spanning decades and continents, this exploration shows how increasingly difficult it is to define masculinity.

The Sartorialist Man: Inspiration Every Man Wants, Education Every Man Needs, by renowned photographer, fashion editor, and social media sensation Scott Schuman, is the definitive fashion primer celebrating the diversity of today's well-dressed man. Schuman's dynamic street photography captures the essence of style as seen through lens of guys of all ages from around the globe. Setting the new standard, the book will be an invaluable resource for men as they explore and hone their unique personal style. "What I didn't want this book to be was a list of rules. But I do outline principles that will help you make confident decisions about your many sartorial choices," says Schuman in the book's introduction. The book begins with "Dressing Your Body Type," because when you know what fits your unique body, the better you can pull off any look. In section one, "Clothing," Schuman delves into wardrobe basics with "Elements"--an illustrated glossary of everything from jackets and pants, and collars and cuffs, to outerwear and underwear. Also sprinkled throughout are "Style Strategies" explaining how stylish gentlemen do what they do so well, and the "Focus" section is filled with tips on to how to talk to a tailor, view the runway, and discover inspiration from friends and colleagues. The second part of the book tackles everything you need to know about accessories--whether to go socks or no socks, and how to tie a tie, choose the right glasses or sunglasses, and find the right shoe. Part three, "Maintenance & Sustainability," is filled with illustrated step-by-step instructions on how to care for, mend, fold, store, and pack your clothes and footwear. Schuman even shares pointers on the how and why to invest in key pieces of your wardrobe, shop online or in person, or buy vintage or new. Refreshing, contemporary, and inspiring, this striking menswear tome will come to define today's essence of style. The Sartorialist: Man is about enjoying the freedom to explore what looks great on you--and that, perhaps, is the ultimate chic.

Innovative and conceptual uses of photography within a highly developed Soviet dissident culture are explored in this examination of photography's place in late Soviet unofficial art. Simultaneous.
