Select Hardware and Sound from the Control Panel, and then select Sound. On the Playback tab, right-click the listing for your audio device, select Set as Default Device, and then select OK. If setting your audio device as the default device doesn't help, continue to the next tip for additional troubleshooting.

Fix sound problems in Windows 10 - support.microsoft.com

Hearing depends on a series of complex steps that change sound waves in the air into electrical signals. Our auditory nerve then carries these signals to the brain. Also available: Journey of Sound to the Brain, an animated video. Source: NIH Medical Arts Sound waves enter the outer ear and travel through a narrow passageway called the ear canal, which leads to the eardrum.
