Norton and Porter pack INTRODUCTION TO FINANCIAL ACCOUNTING, 7e, International Edition with decades of academic and real-world accounting experience. This student-friendly text provides the appropriate blend of academic rigor with step-by-step learning models that reach today's students. Instead of an abstract approach to accounting, you will journey with students through focus companies and their specific financial data and business strategies, imparting students with real-life experience and the decisions they may face. INTRODUCTION TO FINANCIAL ACCOUNTING, 7e, International Edition is a complete teaching system with numbered Examples tied to end-of-chapter homework for step-by-step learning, POD Reviews at the end of every section that provide instant feedback to students to help them master key concepts, as well as NEW Aplia and CengageNOW technology that contains gradable, algorithmic homework activities. Also new is a better and more intuitive system for notating transactions, so students understand better how each transaction affects the financial statements. Best of all, you can completely customize INTRODUCTION TO FINANCIAL ACCOUNTING, 7e, International Edition to include the content you want to cover and in the same sequence as your syllabus.This edition includes a discussion of the current environment of financial reporting, specifically the International Financial Reporting Standards.

The new seventh edition of 'Introduction to Financial Accounting' has been fully revised and updated to reflect the very latest developments in this dynamic field and offers contemporary and comprehensive coverage of Financial Accounting today.

This 6th edition retains all of the classic features that have contributed to the book's success: clarity of expression, the focus on the accounting equation, student activities and real-life commentaries running through each chapter, and the inclusion of the Safe and Sure Annual Report as an example of a listed company.

The fully revised and updated Third Edition of this textbook provides an accessible introduction to accounting for students coming to the subject for the first time. It embraces the basic techniques and underlying theoretical concepts in accounting and shows how these are applied in various circumstances. This New Edition incorporates major changes which improve and update the previous edition. It can be easily used by students working on their own, as well as in a classroom environment. It provides: - Fully illustrated & worked examples - Student Activities - End of chapter questions, many of which have been taken from major accounting examination bodies. -The solutions to all activities are given at the end of each chapter, and answers to the end of chapter questions are also supplied. Introduction to Accounting is an essential textbook for undergraduate accounting students. It is designed to meet the needs of both the non-specialist and those intending to specialise in accounting at undergraduate and also postgraduate levels. The Solutions Manual will be available via the SAGE website.

This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

Whether students become accountants or managers, business owners or bankers, it is important that they understand the nature of financial reporting and how the decisions made by managers affect corporations. Financial Accounting will provide students with a succinct, interactive and coherent introduction to basic financial accounting concepts combined with a strong focus on the use of financial accounting information. KEY TOPICS: The Financial Statements; Recording Business Transactions; Accrual Accounting and the Financial Statements; Cash and Receivables; Inventory and Cost of Goods Sold; Property, Plant, and Equipment, and Intangible Assets; Investments and the Time Value of Money; Liabilities; Shareholders' Equity; The Statement of Cash Flows; Financial Statement Analysis MARKET: For students in Introduction to Financial Accounting courses seeking a practical and engaging learning experience.

This is an introductory level text for students undertaking accounting or business studies that offers a foundation to financial accounting. An interactive approach has been adopted to integrate the theory with practical situations.

For courses in Introductory Accounting. Essentials of Accounting is a self-teaching, self-paced introduction to financial accounting for active users of business data - rather than preparers of accounting information (book keepers). It presents the ideas and terminology essential to an understanding of balance sheets, income statements, and statements of cash flows. Every frame requires students to solve a problem involving accounting information - e.g., selecting a correct word from two choices, providing an answer, making a journal entry, or preparing a complete balance sheet. Appropriate for undergraduate and graduate, executive, vocational or management training.*Self-teaching format - Consists of 11 Parts, each with an average of 75 'frames.' Each frame is a sentence or short paragraph that asks students to DO something relevant to the point being made*A detailed step-by-step approach that requires students to actively participate in the learning process and that guarantees mastery of basics*A serious focus on the use of information - Rather than on book keeping. Describes some of the complicated accounting practices*A gradual progression in level of rigor - Begins with a conc
