The key idea of this book is ISO 31000:2018 is a standard that certified companies, consultants, and management system auditors need to know. Why? ISO has integrated risk into ISO 9001:2015 and has adopted the tagline 'Risk Based Thinking' (RBT). All organizations regardless if they are public or private, for profit or not for profit, large or small face uncertainty. Uncertainty results in risks. More organizations will face uncertainty in the design, implementation, and assurance of their Quality Management System (QMS), Environmental Management System (EMS), Information Security Management System (ISMS), and most ISO management systems. The critical organizational challenge over the next decade is how organizations will address and treat the risks that result from the uncertainty. ISO 31000:2018 was developed to address this growing uncertainty.ISO 31000:2018 consists of risk management principles, framework and process that have been adopted as a national risk management standard by more than 60 countries. The ISO 31000:2018 process can be used to:¿ Support ISO 9000:2015 in the design and implementation of Risk Based Thinking (RBT).¿ Form the basis for Risk Based Problem Solving (RBPS) and Risk Based Decision Making (RBDM). ¿ Establish the basis and foundation for ISO 31000:2018 Enterprise Risk Management (ERM).¿ Become the basis for the organization's risk management principles, framework, and process. ¿ Identify risk stakeholders, customers, and other interested parties.¿ Identify stakeholder risk requirements, needs, and expectations.¿ Identify and establish the context for designing, implementing, and assuring a risk management process.¿ Evolve as the guideline to evaluate and manage upside risk and downside risk.¿ Design and implement a risk management process.¿ Treat and manage risks.¿ Report and document the results and effectiveness of risk treatment and risk management.¿ Communicate the effectiveness of the ISO 31000:2018 risk management framework and process to stakeholders, customers, and interested parties.¿ Monitor and review risks based on organizational risk criteria and risk appetite.

Risk based, decision making (RB -DM), which are the basis for ISO Risk Based Thinking.ISO 31000 RB - PS and RB - DM are the basis for all risk management and are discussed throughout the book.ISO 31000 ERM is a game changer book. Why?* ERM enables executive management to identify and prioritize strategic goals and strategic risks. * ERM promotes a risk aware culture that identifies investment (upside risk) opportunities.* ERM provides the organization the means to align risk strategy, processes, technology, people, and knowledge for the purpose of identify-ing, assessing, and managing uncertainties in the execution of its risk vision and mission critical objectives.* ERM allows for a consistent, repeatable, and scalable approach across the organization and into the supply chain. * ERM enables the organization to more effectively and efficiently man-age enterprise risks. * ERM enables executive management to consider tradeoffs between risks, pursue opportunities (upside risk), determine associated costs, and balance value creation across the enterprise.* ERM processes provide actionable steps for the organization to make its ISO 31000 risk management process more capable and mature. * ERM enables risk owners to identify and assess risks and evaluate their impact on the organization's ability to achieve its mission critical objectives.* ERM develops and implements an effective ISO 31000 risk management framework and risk management process across the enterprise to enhance stakeholder value.* ERM involves architecting, designing, implementing, and assuring policies, processes, capabilities, and responsibilities to identify key risks and effectively treat the risks within the organization's risk appetite.

This book deals with Invitations to Tender (ITTs) for the provision of Facility Management (FM) services. It presents a framework to support companies in preparing clear, comprehensive and effective ITTs, focusing on such key aspects as: organizational structures, tools and procedures for managing information, allocation of information responsibilities, procedures for services monitoring and control, quality policies, and risk management. It discusses and analyzes a range of basic terms and concepts, procedures, and international standards concerning the Tendering Process, as well as the contents of ITTs, which should represent the translation of information needs into requirements related to: the client ' s goals, main categories of information to deal with, expected organization of information, modalities of reporting and control, and level of knowledge to be reached. A further major focus is on potential key innovation scenarios concerning current FM practice, such as Sustainable Procurement, Building Information Modeling (BIM), Big Data and Internet of Things (IoT) technologies, highlighting both the possible benefits and the possible risks and implications that could negatively affect the quality of FM service provision if not properly treated within the ITT. The book will be of interest to real estate owners, demand organizations and facility managers, enhancing their ability to prepare, interpret and/or critically analyze ITTs.
