Drop the kwods into the towering connect 4 grid to form a straight line of four in a row - vertically, horizontally or diagonally. Whoever gets the four in a row wins the game. Sounds easy - but this is a game where you'll need strategy skills in abundance, to plan ahead and trick the competition.

This definitive and essential source of reference has been thoroughly up-dated and revised to meet the requirements of all laboratories involved in the analysis of human semen. The book sets out the fundamental laboratory techniques that should be employed in the diagnosis of male infertility. The text includes descriptions of how to construct a conventional semen profile and provides standardized protocols for performing several optional diagnostic procedures. Such techniques are essential in the evaluation of infertile couples and in assessing fertility in men whose sperm production is suppressed by potential anti-fertility compounds or by toxic agents: they are also of interest in forensic medicine and in connection with artificial insemination. Previous editions of this volume have established themselves as the gold standard in the area of fertility investigation and treatment: this new edition continues that tradition and will be the benchmark for setting more rigorous standards for future years.

The immensely rich archives from the administration of the English poor law before 1834 include letters to the overseers of the poor that came from the poor themselves. As personal testimonies of people claiming relief, which are often written in a stunningly 'private' tone, pauper letters allow deep insights into the living conditions, experiences and attitudes of the labouring poor in the late eighteenth and early nineteenth centuries. This edition contains some 750 of these letters, all those presently known to survive in the county of Essex. The Introduction demonstrates the immense importance of this neglected source, both for the social historian and for the comparative study of literacy.

In "Writing Never Arrives Naked", Penny van Toorn engages our minds and hearts. In this academically innovative book she reveals the resourceful and often poignant ways that Indigenous Australians involved themselves in the colonisers' paper culture. The first Aboriginal readers were children stolen from the clans around Sydney Harbour. The first Aboriginal author was Bennelong -- a stolen adult. From the early years of colonisation, Aboriginal people used written texts to negotiate a changing world, to challenge their oppressors, protect country and kin, and occasionally for economic gain. Van Toorn argues that Aboriginal people were curious about books and papers, and in time began to integrate letters of the alphabet into their graphic traditions. During the 19th and 20th centuries, Aboriginal people played key roles in translating the Bible, and made their political views known in community and regional newspapers. They also sent numerous letters and petitions to political figures, including Queen Victoria. Penny van Toorn challenges the established notion that the colonists' paper culture superseded Indigenous oral cultures. She argues that Indigenous communities developed their own cultures of reading and writing, which involved a complex interplay between their own social protocols and the practices of literacy introduced by the British. Many distinctive features of Aboriginal writing today were shaped by the cultural, socio-political and institutional conditions in which Aboriginal people were living in colonial times.

Between 1925 and 1945 thousands of ordinary Germans of both sexes and all ages wrote letters to Hitler. Lost for decades, a large cache of these letters was recently discovered in the KGB Special Archive in Moscow, having been carted off to Russia by the Soviet Secret Police at the end of the war. The letters range from gushing love letters - 'I love you so much. Write to me, please,' this from a seven-year old girl named Gina - to letters from teachers, students, priests, businessmen and others expressing gratitude for alleviating poverty or restoring dignity to the German people. There are a few protest letters and the occasional desperate plea to release a loved one from a concentration camp, but the overwhelming majority are positive and even rapturous, shedding fresh light on the nature of the Hitler cult in Nazi Germany. This volume is the first publication of these letters in English. It comprises a selection of the letters and includes a contextualizing commentary that explains the situation of each writer, how the letter was dealt with and what it tells us about Nazi Germany. The commentary also describes the bureaucratic procedures that evolved to deal with the correspondence (Hitler never read any of it), which ranged from warm thanks to referral to the Gestapo.
