*Kids have profound and important relationships to the past, but they don't experience history in the same way as adults. For museum professionals and everyone involved in informal history education and exhibition design, this book is the essential new guide to creating meaningful and memorable connections to the past for children. This vital museum audience possesses many of the same dynamic qualities as trained historian—curiosity, inquiry, empathy for the human experience—yet traditional history exhibitions tend to focus on passive looking in the galleries, giving priority to relaying information through words. D. Lynn McRainey and John Russick bring together top museum professionals to present state-of-the-art research and practice that respects and incorporates kids' developmental stages and learning preferences and the specific ways in which kids connect to history. They provide concrete tools for audience research and evaluation; exhibition development and design; and working with kids as "creative consultants." The only book to focus comprehensively on history exhibits for kids, Connecting Kids to History With Museum Exhibitions shows how to enhance the experiences of a vitally important but frequently the least understood museum audience.*

*Public History for a Post-Truth Era* explores how to combat historical denial when faith in facts is at an all-time low. Moving beyond memorial museums or documentaries, the book shares on-the-ground stories of participatory public memory movements that brought people together to grapple with the deep roots and current truths of human rights abuses. It gives an inside look at "Sites of Conscience" around the world, and the memory activists unearthing their hidden histories, from the Soviet Gulag to the slave trade in Senegal. It then follows hundreds of people joining forces across dozens of US cities to fight denial of Guantanamo, mass incarceration, and climate change. As reparations proposals proliferate in the US, the book is a resource for anyone seeking to confront historical injustices and redress their harms. Written in accessible, non-academic language, it will appeal to students, educators, or supportive citizens interested in public history, museums, or movement organizing.

This call to action from AAM's Museums and Community Initiative challenges museums to pursue their potential as active, visible players in community life. Essays and reflections offer food for thought on the complex process of changing the terms of engagement between communities and museums.

The Oxford Handbook of Public History introduces the major debates within public history; the methods and sources that comprise a public historian's tool kit; and exemplary examples of practice. It views public history as a dynamic process combining historical research and a wide range of work with and for the public, informed by a conceptual context. The editors acknowledge the imprecision bedeviling attempts to define public history, and use this book as an opportunity to shape the field by taking a deliberately broad view. They include professional historians who work outside the academy in a range of institutions and sites, and those who are politically committed to communicating history to the wide range of audiences. This volume provides the information and inspiration needed by a practitioner to succeed in the wide range of workplaces that characterizes public history today, for university teachers of public history to assist their students, and for working public historians to keep up to date with recent research. This handbook locates public history as a professional practice within an intellectual framework that is increasingly transnational, technological, and democratic. While the nation state remains the primary means of identification, increased mobility and the digital revolution have occasioned a much broader outlook and awareness of the world beyond national borders. It addresses squarely the tech-savvy, media-literate citizens of the world, the "digital natives" of the twenty-first century, in a way that recognizes the revolution in shared authority that has swept museum work, oral history, and much of public history practice. This volume also provides both currently practicing historians and those entering the field a map for understanding the historical landscape of the future: not just to the historiographical debates of the academy but also the boom in commemoration and history outside the academy evident in many countries since the 1990s, which now constitutes the historical culture in each country. Public historians need to understand both contexts, and to negotiate their implications for questions of historical authority and the public historian's work. The boom in popular history is characterized by a significant increase in both making and consuming history in a range of historical activities such as genealogy, family history, and popular collecting; cultural tourism, historic sites, and memorial museums; increased memorialization, both formal and informal, from roadside memorials to state funded shrines and memorial Internet sites; increased publication of historical novels, biographies, and movies and TV series set in the past. Much of this, as well as a vast array of new community cultural projects, has been facilitated by the digital technologies that have increased the accessibility of historical information, the democratization of practice, and the demand for sharing authority.

Museum lovers know that energy and mystery run through every exhibition. Steven Lubar explains work behind the scenes—collecting, preserving, displaying, and using art and artifacts in teaching, research, and community-building—through historical and contemporary examples, especially the lost but reimagined Jenks Museum at Brown University.

*Mastering Primary Geography* introduces the primary geography curriculum and helps trainees and teachers learn how to plan and teach inspiring lessons that make learning geography irresistible. Topics covered include: - Current developments in geography - Geography as an irresistible activity - Geography as a practical activity - Skills to develop in geography - Promoting curiosity - Assessing children in geography - Practical issues This guide includes examples of children's work, case studies, readings to reflect upon and reflective questions that all help to show students and teachers what is considered to be best and most innovative practice, and how they can use that knowledge in their own teaching to the greatest effect. The book draws on the experience of two leading professionals in primary geography, Anthony Barlow and Sarah Whitehouse, to provide the essential guide to teaching geography for all trainee and qualified primary teachers.

This Volume Will Interest All Students Of English And American Studies; Colonialism And Nationalism; Culture And Gender Issues; The Complex Relation Between Literture And Society; And The Even More Complex Relationship Between Western Texts And Indian Leaders.

Many teens today who use the Internet are actively involved in participatory cultures—joining online communities (Facebook, message boards, game clans), producing creative work in new forms (digital sampling, modding, fan videomaking, fan fiction), working in teams to complete tasks and develop new knowledge (as in Wikipedia), and shaping the flow of media (as in blogging or podcasting). A growing body of scholarship suggests potential benefits of these activities, including opportunities for peer-to-peer learning, development of skills useful in the modern workplace, and a more empowered conception of citizenship. Some argue that young people pick up these key skills and competencies on their own by interacting with popular culture; but the problems of unequal access, lack of media transparency, and the breakdown of traditional forms of socialization and professional training suggest a role for policy and pedagogical intervention. This report aims to shift the conversation about the "digital divide" from questions about access to technology to questions about access to opportunities for involvement in participatory culture and how to provide all young people with the chance to develop the cultural competencies and social skills needed. Fostering these skills, the authors argue, requires a systemic approach to media education; schools, afterschool programs, and parents all have distinctive roles to play. The John D. and Catherine T. MacArthur Foundation Reports on Digital Media and Learning

*Fostering Empathy through Museums* features fifteen case studies with clear take-away ideas, and lessons learned by vividly illustrating a spectrum of approaches in the way museums are currently employing empathy, a critical skill that is relevant to personal, institutional, economical, and societal progress. The need is rapidly growing for empathy to serve as a lens through which we find our purpose and connection in a complex world. This demand brings with it an appetite to cultivate it through safe and trusted platforms. Museums are uniquely equipped to undertake this important mission. This book will help museum staff and leadership at all levels working at a variety of museums (from animal sanctuaries to art museums, from historic house museums to children's and science museums) to better understand the multitude of ways how empathy can be cultivated, and employed in museum setting. Fostering Empathy through Museums will provide inspiration, examples, and lessons learned from a balanced spectrum of museums currently employing empathy in museum setting; as an educational tool to better connect their content with the audience, as an integral element of a museum's institutional values and behavior, and as a phenomenon that is worthy of exploration on its own and as an intentional outcome. This publication provides museum professionals as well as formal and informal learning educators to receive an overview of the variety of approaches to empathy in museums, and to create a shared language and methodologies that could enable them to utilize and nurture empathy as a "shared vision" that would serve not only their organizational mission, but also the greater good. Empathy can be a tool, or an intentional outcome depending on the institution's objectives. Regardless of the choice, the ideas presented in this book are intended to inform and inspire institutions to unlock exciting possibilities in the areas of improved visitor experience, creative community partnerships, and contribution to social progress by bringing empathy to public discourse through institutional strategies, exhibitions, experiences, and programs. The book also provides ideas for future strategies where empathy is considered as a "shared vision" by museums, and a product of a museum experience that might lead to positive social impact.
