This 1997 book views the substantive achievements of the Middle Ages as they relate to early modern science.

Drawing on 28 original essays, *A Companion to the Early Middle Ages* takes an inclusive approach to the history of Britain and Ireland from c.500 to c.1100 to overcome artificial distinctions of modern national boundaries. A collaborative history from leading scholars, covering the key debates and issues surveys the building blocks of political society, and considers whether there were fundamental differences across

Britain and Ireland Considers potential factors for change, including the economy, Christianisation, and the Vikings

This is a print on demand book and is therefore non- returnable. Though buffeted on all sides by rapid and at times cataclysmic social, political, and economic change, the medieval church was able to make adjustments that kept it from becoming simply a fossil from the past rather than an enduring institution of salvation. The dynamic interaction between the medieval church and society gives form to this compelling and

well-informed study by Adriaan Bredero. By considering medieval Christianity in full relation to its historical context, Bredero elucidates complex medieval realities -- many of which run counter to common modern notions about the Middle Ages. Bredero moves beyond the usual treatment of history by framing his overall discussion in terms of a fascinating and relevant question: To what extent is Christianity today still molded by medieval society? The book begins with an overview of religion and the church in medieval society, from the early Christianization of Western Europe through the fifteenth century. Bredero

counters earlier romanticized assessments of the Middle Ages as a thoroughly Christian period by arriving at a definition of Christendom, not in its original sense as the empire of Charlemagne, but rather as "the countries, people, and matters which stood under the influence of Christ."

In this major work, Blumenberg takes issue with Karl Löwith's well-known thesis that the idea of progress is a secularized version of Christian eschatology, which promises a dramatic intervention that will consummate the history of the world from outside.

Instead, Blumenberg argues, the idea of progress always implies a process at work within history, operating through an internal logic that ultimately expresses human choices and is legitimized by human self-assertion, by man's responsibility for his own fate.

This book shows how the Age of Reason actually began during the late Middle Ages.

Greek and Roman epic poetry has always provided creative artists in the modern world with a rich storehouse of themes. Tim Supple and Simon Reade's 1999 stage adaptation of

Ted Hughes' *Tales from Ovid* for the RSC heralded a new lease of life for receptions of the genre, and it now routinely provides raw material for the performance repertoire of both major cultural institutions and emergent, experimental theatre companies. This volume represents the first systematic attempt to chart the afterlife of epic in modern performance traditions, with chapters covering not only a significant chronological span, but also ranging widely across both place and genre, analysing lyric, film, dance, and opera from Europe to Asia and the Americas. What emerges most clearly is how

anxieties about the ability to write epic in the early modern world, together with the ancient precedent of Greek tragedy's reworking of epic material, explain its migration to the theatre. This move, though, was not without problems, as epic encountered the barriers imposed by neo-classicists, who sought to restrict serious theatre to a narrowly defined reality that precluded its broad sweeps across time and place. In many instances in recent years, the fact that the Homeric epics were composed orally has rendered reinvention not only legitimate, but also deeply appropriate, opening up a range

of forms and traditions within which epic themes and structures may be explored.

Drawing on the expertise of specialists from the fields of classical studies, English and comparative literature, modern languages, music, dance, and theatre and performance studies, as well as from practitioners within the creative industries, the volume is able to offer an unprecedented modern and dynamic study of 'epic' content and form across myriad diverse performance arenas.
