14.42 | Lecture 17 slides: Natural resource economics II

Resource economics deals with human use and sustainability of natural resources. One of the fundamental rules of any economics discipline is the question of trade-offs. The assumption exists that we will always want more than we can have and gaining something naturally means we are doing without something else. Thus, there is a trade-off.

What is Resource Economics? (with pictures)

The 5 Most Important Natural Resources are: Air: Clean air is important for all the plants, animals, humans to survive on this planet. So, it is necessary to take measures to reduce air pollution. Water: 70% of the Earth is covered in water and only 2 % of that is freshwater.
