I strongly prefer that people do not use OpenCV at all, in either Python or C++! Feel free to learn more about OpenCV in either language, but do not for one second stay under the illusion that it represents or contains good software engineering practices or good API design. In my opinion, it scores very, very, very low on both.

Python for ease of development, access to a wide variety of libraries, and maintainability. OpenCV under Python is generally pretty close to C++ speed because the performance critical parts are C code inside a Python wrapper. In my opinion, the only time you should consider a C++ implementation is when speed and hardware cost are a factor.
