Shortlisted for the Orwell Prize 2016We all depend on the finance sector. We need it to store our money, manage our payments, finance housing stock, restore infrastructure, fund retirement and support new business. But these roles comprise only a tiny sliver of the sector's activity: the vast majority of lending is within the finance sector. So what is it all for? What is the purpose of this activity? And why is it so profitable?John Kay, a distinguished economist with wide experience of the financial sector, argues that the industry's perceived profitability is partly illusory, and partly an appropriation of wealth created elsewhere - of other people's money. The financial sector, he shows, has grown too large, detached itself from ordinary business and everyday life, and has become an industry that mostly trades with itself, talks to itself, and judges itself by reference to standards which it has itself generated. And the outside world has itself adopted those standards, bailing out financial institutions that have failed all of us through greed and mismanagement. We need finance, but today we have far too much of a good thing. In Other People's Money John Kay shows in his inimitable style what has gone wrong in the dark heart of finance.

The finance sector of Western economies is too large and attracts too many of the smartest college graduates. Financialization over the past three decades has created a structure that lacks resilience and supports absurd volumes of trading. The finance sector devotes too little attention to the search for new investment opportunities and the stewardship of existing ones, and far too much to secondary-market dealing in existing assets. Regulation has contributed more to the problems than the solutions. Why? What is finance for? John Kay, with wide practical and academic experience in the world of finance, understands the operation of the financial sector better than most. He believes in good banks and effective asset managers, but good banks and effective asset managers are not what he sees. In a dazzling and revelatory tour of the financial world as it has emerged from the wreckage of the 2008 crisis, Kay does not flinch in his criticism: we do need some of the things that Citigroup and Goldman Sachs do, but we do not need Citigroup and Goldman to do them. And many of the things done by Citigroup and Goldman do not need to be done at all. The finance sector needs to be reminded of its primary purpose: to manage other people's money for the benefit of businesses and households. It is an aberration when the some of the finest mathematical and scientific minds are tasked with devising algorithms for the sole purpose of exploiting the weakness of other algorithms for computerized trading in securities. To travel further down that road leads to ruin. A Financial Times Book of the Year, 2015 An Economist Best Book of the Year, 2015 A Bloomberg Best Book of the Year, 2015

A scathing and well-informed critique of the financial industry by leading economist John Kay.

Everything from home mortgages to climate change has become financialized, as vast fortunes are generated by individuals who build nothing of lasting value. Das shows how \"extreme money\" has become ever more unreal; how \"voodoo banking\" continues to generate massive phony profits even now; and how a new generation of \"Masters of the Universe\" has come to domiinate the world.

The great monopoly in this country is money. So long as that exists, our old variety and individual energy of development are out of the question. A great industrial nation is controlled by its system of credit.

A veteran New York Times reporter dissects the most spectacular failure in real estate history Real estate giant Tishman Speyer and its partner, BlackRock, lost billions of dollars when their much-vaunted purchase of Stuyvesant Town–Peter Cooper Village in New York City failed to deliver the expected profits. But how did Tishman Speyer walk away from the deal unscathed, while others took the financial hit—and MetLife scored a \$3 billion profit? Illuminating the world of big real estate the way Too Big to Fail did for banks, Other People's Money is a riveting account of politics, high finance, and the hubris that ultimately led to the nationwide real estate meltdown.
