The OECD Compilation Manual for Index of Services Production contains guidelines and methodologies to measure short-term production activities of the services sector by national agencies and international organisations.

Multimedia has two fundamental characteristics that can be expressed by the following formula: Multimedia = Multiple Media + Hypermedia. How can software engineering take advantage of these two characteristics? Will these two characteristics pose problems in multimedia systems design? These are some of the issues to be explored in this book. The first two chapters will be of interest to managers, software engineers, programmers, and people interested in gaining an overall understanding of multimedia software engineering. The next six chapters present multimedia software engineering according to the conceptual framework introduced in Chapter One. This is of particular use to practitioners, system developers, multimedia application designers, programmers, and people interested in prototyping multimedia applications. The next three chapters are more research-oriented and are mainly intended for researchers working on the specification, modeling, and analysis of distributed multimedia systems, but will also be relevant to scientists, researchers, and software engineers interested in the systems and theoretical aspects of multimedia software engineering. Multimedia Software Engineering can be used as a textbook in a graduate course on multimedia software engineering or in an undergraduate course on software design where the emphasis is on multimedia applications. It is especially suitable for a project-oriented course.

Identifying and assessing the ways in which changes in the marketing mix affect consumer behavior is key to a successful marketing strategy. The Essentials of Marketing Research guides the student in designing, conducting and interpreting marketing research. This

comprehensive textbook covers the full range of topics, including: Secondary research and data mining Internet marketing research Qualitative and exploratory research Statistical analysis Marketing research ethics With learning objectives at the beginning of each chapter, a host of cases and a comprehensive companion website, this book offers a range of tools to help students develop and test their research and analytical skills.
