Another technique is to use streams, like file streams. First lets take a look at how the socket extension code looks like.

Socket Programming with Streams in Php - BinaryTides

UDP Sockets in Php In a previous article we learnt about writing simple server and clients using TCP sockets in php. In this article we are going to use udp sockets for the same. UDP sockets are much simpler to work with since they are connection-less. A udp server just has an socket that waits... [Read More »](#)

1. Create a socket. The socket function can be used to create a socket. In the following code example we shall

Read Free Php Socket Programming Tutorial

```
create a tcp socket. #!/usr/bin/perl -w
use Socket; # For constants like
AF_INET and SOCK_STREAM $proto =
getprotobyname ('tcp'); #get the tcp
protocol # 1. create a socket handle
(descriptor) my ($sock); socket ($sock,
AF_INET, SOCK_STREAM, $proto) or
die $!;
```

Perl Socket programming Tutorial - BinaryTides

Note that `socket_bind()` must be called before `socket_connect()` or `socket_listen()`. Listen for connections. After binding a socket to a port the next thing we need to do is listen for connections. For this we need to put the socket in listening mode. Function `socket_listen()` is used to put the socket in listening mode. Just add the following ...
