There is a driving need for naval professionals to focus on human factors issues. The number of maritime accidents is increasing and the chief cause is human error, both by the designer and the operator. Decreasing crew size, lack of experienced operators, operations in higher sea states and fatigue

worsen the situation. Automation can be a partial solution, but flawed automated systems actually contribute to accidents at sea. Up to now, there has been no overarching resource available to naval marine vehicle designers and human factors professionals which bridges the gap between the human and the machine in this context. Designers understand the marine vehicle; human factors professionals understand how a particular environment affects people. Yet neither has a practical understanding of the other's field, and thus communicating requirements and solutions is difficult. This book integrates knowledge from numerous sources as well as the advice of a panel of eight recognized experts in the fields of related research, development and operation. The result is a reference that bridges the communications gap, and stands to help enhance the design and operation of all naval marine vehicles.

This title begins with an insightful synopsis of the business of the internet. This sets the stage for understanding the business principles that follow. The book also includes a step-by-step owner's manual, designed to give readers the tools they need to drive the net to greater profitability within their own business.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

Taking a practical "how-to" approach, ERISA Law Answer Book places an emphasis on decisionmaking as it focuses on questions commonly asked of pension and health plan advisors in connection with the administration of retirement programs. Rather than merely citing the Code and Regulations for authority and identifying cases that support the proposition or answer given, this work sets forth a discussion of case authorities that have death with the relevant situation at hand, and provides a careful analysis of how those cases apply. Key topics covered include: benefit arrangements subject to ERISA - construing and interpreting ERISA plans - notice, reporting and disclosure - plan funding - plan distribution - benefit accrual and vesting - fiduciary duties and liabilities - preemption - standard of review - bankruptcy. This product is available on the Internet. Ask your CCH representative for details.
