A US/Brazil trade conflict on the Brazilian protectionist electronics policy developed during 1985-89. In that period and under the threat of trade sanctions, a few changes were made in the Brazilian policy. Major consequences of the conflict were felt after its conclusion. It was one important political factor among the forces that pushed for the opening of the Brazilian electronics market in the early 1990s.

Released by the Prime Minister of India, Shri Atal Bihari Vajpayee on 24th May, 2003, this book brings together 3 top-ranking independent reports that outlining a comprehensive manufacturing policy framework for India.

The Politics of Capitalist Transformation is the only book-length study of the highly protectionist Brazilian informatics policy from its origins in the early 1970s to the collapse of the market reserve in the early 1990s and its impact in subsequent decades. Jeff Seward provides a sophisticated political analysis of how state activists constructed high levels of state autonomy to try to shift Brazil to a new variety of capitalism by eclipsing the multinational companies (especially IBM) that dominated the Brazilian computer sector and replacing them with local companies with 100 percent Brazilian technology and ownership. This ambitious policy required repeated shifts of political strategy and policymaking institutions to respond to a constantly changing economic and political environment as Brazil made a dramatic transition from military dictatorship to democracy. The innovative framework to analyze state autonomy and the sophisticated political analysis of the policymaking process will be of interest to scholars and students of Brazilian and Latin American political economy, varieties of capitalism theory, state theory, democratic transition theory, and high technology

Brazil is the most populous economy in Latin America with the second highest GDP among the emerging BRIC economies, after China, and the second per capita GDP among the BRIC economies after Russia. The objective of this book is to provide a thorough historical, statistical, and institutional description of the factors that affect and are affected by Brazil's international trade and integration with the world economy. It includes a most recent account of what is presently going on in Brazil and the type of economy from which Brazil is emerging. The authors use Brazil as a case study and explain both the process and the outcome of international economic integration by analyzing in each chapter a different contributing factor to the benefits and costs from Brazil's economic interdependency with the world economy. This makes the reading of this book extremely valuable. The topics addressed in this book will increase the reader's awareness of the institutional, economic, and cultural forces that shape the dynamism of Brazil's international trade and integration with the world economy, and will continue to do so in future years.
