larger image) Stage 1 ... Mid Continent Orthodontics, founded by Dr. Harry Green, is a continuing dental/orthodontic education organization dedicated to providing high quality orthodontic education to general dentists and pedodontists.

The Tip-Edge® System | Mid Continent Orthodontics

The prototype Tip-Edge brackets were therefore derived from a single .022 inch straight-wire bracket merely by cutting away two diametrically opposed corners from the archwire slot . 1 This resulted in a bracket that enabled the crown to tip in a predetermined direction, whereas with an archwire of full vertical thickness, it would resist tipping in the reverse direction. This was a logical design, since the desired direction of tipping, in routine orthodontic cases, is easy to predict.

Dynamics of Tip-Edge | Pocket Dentistry

Tip-Edge is a single wing bracket that does not lose its rotational control. The base is every bit as wide as a twin bracket. The Tip-Edge technique allows you to utilize the maximum prescription built into the bracket for finishing, i.e., 100% bracket expression. No other system can achieve that.

Tip-Edge PLUS® Aesthetic Brackets - TP Orthodontics

Tip-Edge orthodontics is a minimally invasive, esthetic approach to straightening the smile. Many Cape Coral, FL, patients find Tip-Edge orthodontics ideal for opening or closing the bite and correcting crooked teeth, crowding and other oral concerns. Tip-Edge orthodontics differ

Anchorage mode • Tip-Edge appliance has the capability of combining advantages of both Begg and Straight wire concepts • Variable anchorage with Class II traction was demonstrated by Dr. Begg • Works effectively in Class II- difficult deep bites, (elastics preferred over headgear) • Side effects eg clockwise rotation of occlusal plane, opening of mandibular angle, & elongation of upper incisors avoided by use of light forces

Tip edge appliance - SlideShare

TIP EDGE • Dr. Peter Kesling (the inventor of tip edge), combined the tipping ability of the Begg technique with the control of Straight wire. • Began with a straight edge bracket and removed two wedges in the slot, which allows the tooth to tip up to 25 degrees.
