The Yamaha YZF600R (Thundercat in European markets) is a 599 cc (36.6 cu in) sports bike made by Yamaha from 1996 to 2007. While similar in style to its sibling, the YZF-R6, the 600R maintains some significant differences, including a less aggressive posture, lower revving and higher torque producing motor, and a large 1 piece seat.

What you get with the YZF is a 600 that is heavier and less focused on hard core sport riding, but with trade offs that make it a much more practical mount. The YZF600R has excellent mid-range power for a 600 -- even compared with more current designs.
